Packaging and food consultancy.

global ideas

HOME

global success

Landell Mills Ltd was founded in 1975 to provide research and management services in the natural resource sectors. Today, after more than 30 years of international development work, the company has successfully undertaken in excess of 600 projects in over 100 countries. The company has grown and broadened its scope but not lost its focus. Landell Mills works primarily on projects financed by international funding agencies – the UK Department for International Development, European Commission, World Bank, Asian Development Bank, African Development Bank, and UN Agencies – as well as directly with the governments of developing countries, the private sector and civil society.

Landell Mills is based in Wiltshire, UK and is managed by a core staff of 20 professionals who possess a broad multidisciplinary capacity. We also have over 200 field staff on assignment overseas at any one time and a network of offices throughout the world. Over 7,000 associate specialists, from Europe and the developing world, support Landell Mills' work.

stable economy - future growth

HOME

- Our mission is to provide high quality consulting services which support socio-economic development and good governance
- Our aim is to stimulate self-reliance and sustainability through participatory development that is relevant to the local context
- Our guiding principles are transparency, efficiency, accountability and respect for stakeholders

global sustainability
